

Call for Application to Host the WRRmod2024 Seminar

The International Water Association (IWA) Water Resource Recovery Modelling (WRRmod) seminar is a prestigious event, that brings together international specialists in wastewater treatment process modelling to share their work on recent advances in modelling waste treatment and resource recovery systems. It is a distinctive conference that could enhance the profile of hosting organisations or institutions, within the wastewater treatment community.

On behalf of the IWA modelling and integrated assessment (MIA) group, we welcome applications from all who wish to host the 9th IWA Water Resource Recovery Modelling Seminar (WRRmod2024).

The application process involves sending an expression of interest, in the form of a short (about 5 min) pre-recorded presentation that provides:

1. Basic information about the institutions of the host(s),
2. Where you intend to host the WRRmod2024 Seminar. At least providing information about the country and specific city/town (the more detail, the better).
3. The proposed conference themes.
4. Anything that would showcase your location as ideal for an exciting and vibrant WRRmod2024.

Information on organisation of IWA events can be found at <https://iwa-network.org/organise-an-event/>.

The Organising Committee for WRRmod2023 will review all applications and select the top five offers. These top offers shall then be presented at the WRRmod2021 virtual conference, where, on reviewing your presentation, the delegates shall vote (online) for the WRRmod2024 finalist.

Selection of the organizers/location of WRRmod2024 will be announced on 25th August, during the closing speech.

If you are interested in organizing the WRRmod2024 conference, please **send us your applications before 25th July 2021 by sending your short-pre-recorded presentations via email to david.ikumi@uct.ac.za.**

 2014	 2016	 2018	 2021	 2023	 2024
Spa, Belgium	Anncy, France	Lac Beauport, Canada	Arosa, Switzerland	Stellenbosch, South Africa	Yours for the taking

We look forward to receiving your application.

Best regards,
David Ikumi, Theodor Harding and Chris Gaszynski (UCT)
Organizers of the IWA/WEF WRRmod2023 Seminar.
